DEPOSITORY LIBRARY MATERIAL

Note

This and other government publications may be purchased from local authorized agents and other community bookstores or by mail order.

Mail orders should be sent to Publications Distribution, Statistics Canada, Ottawa, K1A OT6, or to Publishing Centre, Supply and Services Canada, Ottawa, K1A OS9.

Inquiries about this publication should be addressed to:

Provincial Section,
Public Finance Division,

Statistics Canada, Ottawa, K1A OT6 (telephone: 995-8201) or to a local office of the bureau's User Advisory Services Division:

| | |
|--------------------|------------|
| St. John's (Nfld.) | (726-0713) |
| Halifax | (426-5331) |
| Montréal | (283-5725) |
| Ottawa | (992-4734) |
| Toronto | (966-6586) |
| Winnipeg | (949-4020) |
| Regina | (569-5405) |
| Edmonton | (425-5052) |
| Vancouver | (666-3695) |

Toll-free access to the regional statistical information service is provided in Nova Scotia, New Brunswick, and Prince Edward Island by telephoning 1-800-565-7192. Throughout Saskatchewan, the Regina office can be reached by dialing 1-800-667-3524, and throughout Alberta, the Edmonton office can be reached by dialing 1-800-222-6400.

Nota

On peut se procurer cette publication, ainsi que toutes les publications du gouvernement du Canada, auprès des agents autorisés locaux, dans les librairies ordinaires ou par la poste.

Les commandes par la poste devront parvenir à Distribution des publications, Statistique Canada, Ottawa, K1A OT6, ou à Imprimerie et édition, Approvisionnements et services Canada, Ottawa, K1A OS9.

Toutes demandes de renseignements sur la présente publication doivent être adressées à:

Section provinciale,
Division des finances publiques,

Statistique Canada, Ottawa, K1A OT6 (téléphone: 995-8201) ou à un bureau local de la Division de l'assistance-utilisateurs situé aux endroits suivants:

| | |

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- r revised figures.

NOTE: Because of rounding, totals and sub-totals for statistical tables may differ slightly from the sum of their component parts.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistiques Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- r nombres rectifiés.

NOTA: À cause de l'arrondissement des chiffres, les totaux et sous-totaux des tableaux ne correspondent pas toujours à l'addition de leurs composants.

INTRODUCTION

This publication presents the revenues and expenditures of the governments of each of the Canadian provinces and territories in the form of government financial management statistics. The primary objective of the publication is to meet the needs of users of financial information pertaining to the activities of these governments by converting the idiosyncratic data produced by each government into standardized statistics which are compatible as between these governments (and also with those of other levels of government produced by the Public Finance Division of Statistics Canada) and are consistent from one reference period to another.

The Financial Management Statistics System

The concepts and classifications underlying this statistical system are described in detail in the publication The Canadian System of Government Financial Management Statistics (Catalogue 68-506). Canadian governments at all three levels - federal, provincial and local - display much the same organizational structure - a legislature to which is subordinated a central core of departments to which, in turn, are attached numbers of agencies with varying degrees of autonomy. However, this general similarity of structure disappears when a detailed examination is made. Similarly-named entities perform quite different roles in different governments; services provided by a department in one government are provided by an agency in a second and are not provided at all in a third; and, while most agencies provide "government-type" services, others provide goods or services which in other jurisdiction could be, and often are, provided by non government commercial entities. Furthermore, since most government finance reports are designed to show administrative accountability and hence are closely related to organizational structures, the raw data contained in these reports are practically useless for any study which seeks to relate the financial activities of one government to those of another.

The Canadian System of Government Financial Management Statistics seeks to overcome the lack of homogeneity in raw government financial information at the provincial/territorial level in the following ways:

1. The government universe is divided into two parts - general government and government enterprises. The general government consists of:
 - (a) departments of government;
 - (b) special funds:
 - (1) administrative and regulatory funds which perform functions similar to those of government departments;

Cette publication présente les revenus et dépenses publics de chaque province ou territoire du Canada sous forme de statistiques de la gestion financière des gouvernements. Elle vise d'abord à répondre aux besoins des utilisateurs en renseignements financiers relatifs aux activités de ces gouvernements en transformant les données particulières produites par chacun en statistiques normalisées pour les divers gouvernements (compatibles avec celles produites par la Division des finances publiques de Statistique Canada sur d'autres niveaux de gouvernement) et comparables d'une période de référence à une autre.

Système statistique de la gestion financière

Les concepts et classifications qui sous-tendent ce système statistique sont décrits en détail dans la publication Le système canadien des statistiques de la gestion financière (n° 68-506 au catalogue). Les trois paliers de gouvernement au Canada - fédéral, provincial et local - se ressemblent beaucoup; ils comprennent une assemblée législative dont relève un groupe central de ministères ou services auxquels se rattachent une grande quantité d'organismes jouissant de divers degrés d'autonomie. Cependant, cette similitude de structure ne soutient pas un examen détaillé. Des ministères ou services ayant des noms semblables diffèrent sensiblement dans le cas de certains gouvernements; certains services fournis par un ministère dans une province le sont par un organisme dans une autre et ne le sont pas dans une troisième; de plus, bien que la plupart des organismes assurent des services "publics", d'autres organismes fournissent des biens ou services qui, ailleurs, pourraient être fournis, et le sont souvent, par l'entreprise privée. Comme la plupart des rapports financiers des gouvernements font état de la responsabilité administrative et, par conséquent, suivent de près la structure de l'organisation, les données qu'ils renferment sont presque inutiles pour toute étude visant à comparer les activités financières de divers gouvernements.

Le système canadien des statistiques de la gestion financière cherche à corriger le manque d'homogénéité entre les renseignements financiers fournis par les diverses provinces ou territoires par les moyens suivants:

1. L'univers est subdivisé en deux parties: l'univers gouvernementale et celui des entreprises publiques. L'univers gouvernemental comprend:
 - a) les ministères;
 - b) les fonds spéciaux:
 - (1) fonds administratifs et réglementaires dont les fonctions sont semblables à celles des ministères;

- (2) agencies engaged in "industrial" or "commercial" activities, primarily to service the requirements of their own governments;
 - (3) agencies engaged primarily in the channelling of funds from one level of government to another or among organizations at the same level of government, e.g., bodies established by provincial legislation to help finance the capital programs of municipalities and school boards;
 - (4) Workers' Compensation Boards;
 - (c) government-owned institutions such as those engaged in education, health and welfare services or administration of justice, e.g., agricultural schools, residences for handicapped persons, gaols, etc.;
 - (d) Quebec Pension Plan;
 - (e) non-trusted public service pension plans because their funds constitute an integral part of the consolidated revenue fund or which are otherwise available to the government in the financing of its operations;
 - (f) working capital funds.
2. All entities classified to general government are consolidated into a single statistical unit for each government.
 3. Revenues of each unit are classified by source and expenditures by function or purpose, while assets and liabilities conform with normal accounting classifications.
 4. A government enterprise is an organized entity, usually corporate, established by a government to produce goods or services for sale on the open market at prices related to costs (this relationship being ascertainable from its own independent system of accounts), which has relatively autonomous management of its affairs and is staffed by other than public servants, though certain staff benefit schemes, e.g., superannuation, may be integrated with those of the public service of the parent government. The enterprises are classified by parent government and by Standard Industrial Classification. Financial statistics classifications for enterprises generally accord with those of commercial accounting.

While the foregoing outlines the bases on which the financial management system rests, the reader is urged to refer to the descriptive publication mentioned above to obtain the more detailed knowledge which is a prerequisite for the full comprehension and use of the statistics produced in accordance with this system. The full range of these statistical series is listed on the rear cover of the present publication.

- (2) organismes ayant une activité "industrielle" ou "commerciale" pour répondre avant tout aux besoins des gouvernements dont ils relèvent;
 - (3) organismes dont l'activité principale est l'acheminement de fonds d'un échelon de gouvernement à un autre ou entre des organismes d'un même échelon, comme ceux créés par des lois provinciales pour aider au financement des investissements des municipalités et des conseils scolaires;
 - (4) commissions des accidents du travail;
 - c) les établissements appartenant à des gouvernements comme ceux qui s'occupent de l'éducation, de la santé et du bien-être social, ou de l'administration de la justice. Dans cette catégorie, entrent les écoles d'agriculture, les résidences pour personnes handicapées, les prisons, etc.
 - d) le Régime des rentes du Québec;
 - e) les régimes de pensions de la Fonction publique non constitués en fiducie parce que leurs fonds forment une partie intégrante du fonds consolidé du revenu ou sont de toute autre manière à la disposition du gouvernement pour le financement de ses activités;
 - f) les fonds de roulement.
2. Toutes les entités classées dans l'univers gouvernemental sont groupées en une seule unité statistique pour chaque gouvernement.
 3. Les revenus de chaque unité sont classés par source et les dépenses, par fonction ou but, tandis que les éléments d'actif et de passif suivent les classifications comptables normales.
 4. Une entreprise publique est une personne morale, habituellement une société, créée par un gouvernement pour produire des biens ou services en vue de leur vente sur le marché libre à des prix établis en fonction des coûts (cela peut être vérifié à partir de son propre système indépendant de comptes), qui gère ses propres affaires de façon relativement autonome et dont le personnel n'est pas constitué de fonctionnaires, bien que certains avantages sociaux, comme la pension de retraite, puissent être intégrés à ceux de gouvernement dont elle relève. Les entreprises sont classées selon le gouvernement dont elles relèvent et les catégories de la Classification des activités économiques. La statistique financière des entreprises correspond généralement à la comptabilité commerciale.

Même si nous venons d'esquisser les bases du système de gestion financière, nous prions le lecteur de se reporter à la publication mentionnée plus haut afin de mieux connaître ces bases, une condition essentielle à la parfaite compréhension et à l'utilisation des statistiques produites conformément à ce système. Vous trouverez la liste complète de ces séries statistiques sur la partie arrière de la couverture de cette publication.

The National Accounts Statistical System

A second national standardized system for the production of financial statistics of Canadian governments is contained in the framework of the Canadian System of National Accounts. While the financial management system depicts the expenditures made by government to discharge its functions, the relative importance of the different types of revenue raised to defray these expenditures, the means used to finance the deficit between revenue and expenditure or to dispose of any surplus of revenue over expenditure and the resulting financial situation of government; the economic analysis system is concerned with the economic effects of government activity. Although there are significant differences between the two systems in concepts and, particularly, in classifications, it is possible, as is shown in this publication, to cross-classify government financial data in terms of both systems. But, just as the resulting financial management statistics differ significantly from the estimates or public accounts from which they are derived, so the economic analysis statistics differ from the national income and expenditure accounts.

Coverage, Sources and Validity

The present publication covers the general government universe of each province and territory on an all-inclusive basis except for certain institutions for which complete financial reports are unavailable. These institutions are incorporated only to the extent of their financial transactions with their present governments; certain very minor revenues which these institutions obtain from other sources are omitted from the publication as are detailed analyses of their expenditures.

The financial statistics in this publication are derived from information contained in the estimates and budget speeches of the governments and from estimates of the special funds' financial transactions as compiled by the Public Finance Division. Additional detail is obtained in a few instances from correspondence with provincial and territorial authorities. The co-operation of provincial and territorial government officials is gratefully acknowledged.

The main tables in this publication have been reviewed by officials of the governments to which the data relates but final responsibility for the validity of the statistics remains with the Provincial Government Section of the Public Finance Division of Statistics Canada.

The following tables indicate the importance of revenue sources and expenditure functions in terms of their percentage of gross general revenue and expenditure for 1978-79.

Système statistique des comptes nationaux

Le système canadien de la comptabilité nationale est un deuxième système national normalisé pour la statistique financière des gouvernements canadiens. Alors que le système de la gestion financière présente les dépenses effectuées par les gouvernements pour s'acquitter de leurs fonctions, l'importance relative des différentes sources de revenus perçues pour assumer ces dépenses, les moyens utilisés pour financer le manque de revenus par rapport aux dépenses ou pour disposer l'excédent des revenus sur les dépenses et la situation financière finale des gouvernements; le système d'analyse économique s'intéresse, pour sa part, aux incidences économiques de leurs activités. En dépit de différences conceptuelles sensibles entre les deux systèmes, principalement dans les classifications, il est possible, comme le démontre cette publication, de recouper les données financières des deux systèmes sur les gouvernements. Mais, tout comme les statistiques sur la gestion financière diffèrent considérablement des budgets ou des comptes publics dont elles sont dérivées, les résultats de l'analyse économique sont différents de ceux des comptes nationaux des revenus et dépenses.

Champ d'observation, sources et validité

La présente publication englobe toutes les activités gouvernementales de chaque province ou territoire, sauf certaines institutions pour lesquelles il n'existe pas de rapports financiers complets. Nous n'avons tenu compte de ces institutions que pour leurs transactions financières avec le gouvernement dont elles relèvent; cette publication ne prend pas en compte certains revenus très faibles provenant d'autres sources et n'analyse pas leurs dépenses en détail.

Les statistiques financières de cette publication sont tirées de renseignements contenus dans les Prévisions et les discours du budget des gouvernements et des transactions financières des fonds spéciaux estimées par la Division des finances publiques. Dans quelques cas, des détails supplémentaires ont été obtenus directement des autorités provinciales ou territoriales. Nous remercions les fonctionnaires des provinces et territoires de la collaboration qu'ils nous ont accordée.

Les principaux tableaux de cette publication ont été vérifiés par les fonctionnaires compétents des gouvernements, mais c'est la Section des administrations provinciales, Division des finances publiques, Statistique Canada, qui a la responsabilité définitive des statistiques.

Les tableaux suivants expriment l'importance en pourcentage pour 1978-79 des sources de revenus et des fonctions des dépenses par rapport aux revenus généraux bruts et aux dépenses générales brutes.

Revenue

The gross general revenue of all provincial and territorial governments for the fiscal year ending March 31, 1979 is estimated at 48,147.2 million, an increase of 4,987.3 million or 11.6% over the corresponding revised estimate for the fiscal year ended March 31, 1978. Of this increase 2,375.4 million or 5.5 percentage points is accounted for by higher tax revenue, and 2,053.7 million or 4.8 percentage points by higher non-tax revenue from own sources. It is expected transfer payments from other levels of government and their enterprises will increase by \$558.2 million or 1.3 percentage points.

Tax revenue increased moderately during this fiscal year. Corporation income tax increases, mainly in Ontario, were largely offset by the decrease in general sales tax. This is due to the federal-provincial financing arrangements associated with the temporary reduction in provincial retail sales tax rates. In addition, Alberta abolished its gasoline and diesel fuel tax.

The large increase in non-tax revenue from own sources is due largely to higher oil and natural gas revenues in the western provinces, and the first year of operations for the Régie de l'assurance-automobile du Québec.

Transfer payments increased slightly due to the financial arrangements associated with the established programs.

The following table shows what increases or decreases are expected in the yields of the main revenue sources of the individual provinces in 1978-79, both in absolute and percentage terms.

Revenue

Les revenus généraux bruts de tous les gouvernements provinciaux et territoriaux pour l'année financière se terminant le 31 mars 1979 sont estimés à 48,147.2 millions, soit une augmentation de 4,987.3 millions ou 11.6 % par rapport aux prévisions rectifiées correspondantes de l'année financière terminée le 31 mars 1978. De cet accroissement \$2,375.4 millions ou 5.5 points de pourcentage proviennent de la croissance des revenus fiscaux et \$2,053.7 millions ou 4.8 points de pourcentage de l'augmentation des revenus non fiscaux de sources propres. Les paiements de transferts provenant d'autres niveaux de gouvernement et de leurs entreprises de \$558.2 millions ou 1.3 points de pourcentage.

Les impôts ont augmenté sensiblement durant l'année fiscale. L'effet de l'augmentation des impôts des corporations, principalement en Ontario, fut grandement atténuée par la réduction des taxes générales de vente durant une partie de l'année fiscale. C'est le résultat d'un accord fédéral-provincial au sujet de la réduction temporaire du taux de la taxe de vente. En Alberta, on a aboli l'impôt sur la gasoline et le diesel.

La mise en opération de la Régie de l'assurance-automobile du Québec ainsi que des revenus plus élevés pour l'huile et le gaz naturel dans les provinces de l'ouest ont contribué largement à l'importante augmentation des revenus de sources propres.

Les paiements de transfert ont augmenté sensiblement à cause des arrangements financiers provenant des programmes établis.

Dans le tableau suivant figurent les augmentations et les diminutions prévues pour les principales sources de revenu de chaque province en 1978-79, en chiffres absolus et en pourcentage.

Expenditure

The gross general expenditure of all provincial and territorial governments for the fiscal year ending March 31, 1979 is estimated at \$48,675.5 million, an increase of \$4,173.0 million or 9.4% over the revised estimate for the previous fiscal year. Outlays on the education function are expected to rise by \$527.2 million or 1.2 percentage points of the overall expenditure increase. It is estimated that health expenditures will account for \$911.6 million or 2.1 percentage points of the increase, and also that social welfare service costs will grow by \$495.9 million or 1.1 percentage points. Debt charges are expected to rise by \$423.4 million or 1.0 percentage points and other expenditures to rise by \$1,436.8 million or 3.2 percentage points. It is anticipated transportation and communication expenditures will increase by \$378.1 million or 0.9 percentage points.

Expenditure growth for the main functions was slower than in previous years largely due to the effort of provincial governments to restrain spending.

Interest on public debt continues to increase because of the borrowing requirements of certain provinces.

The following table shows what changes are expected in outlays on the main expenditure functions of the individual provinces in 1978-79, both in absolute and percentage terms.

Dépenses

Les dépenses générales brutes de tous les gouvernements provinciaux et territoriaux pour l'année financière se terminant le 31 mars 1979 sont estimées à \$48,675.5 millions, soit une augmentation de \$4,173.0 millions ou 9.4% par rapport aux prévisions rectifiées de l'année financière précédente. Dans le secteur de l'éducation, les dépenses augmentent de \$527.2 millions, soit 1.2 points de pourcentage de l'augmentation générale des dépenses. Des dépenses plus élevées pour la santé représentant \$911.6 millions ou 2.1 points de pourcentage de l'augmentation générale et le coût des services du bien-être social augmente de \$495.9 millions ou 1.1 points de pourcentage. Le service de la dette et les autres dépenses se sont accrus respectivement de \$423.4 ou 1.0 points de pourcentage et \$1,436.8 millions ou 3.2 points de pourcentage. Les dépenses dans le secteur des transports et communications augmentent de \$378.1 millions ou 0.9 points de pourcentage.

La tendance générale qui fait que les provinces ont surveillé de plus près leurs dépenses explique en grande partie la hausse plutôt légère des principales fonctions de dépenses pour l'année fiscale.

L'augmentation du service de la dette révèle les besoins de capitaux pour certaines provinces.

Dans le tableau suivant figurent les variations prévues des dépenses par principales fonctions pour chaque province en 1978-79, en chiffres absolus et en pourcentage.

Increase or Decrease in Provincial Expenditure by Main Function Between 1977-78^r and 1978-79

Tables 1 and 2 — Estimated Gross General
Revenue and Expenditure

These tables combine the capital and current revenue and expenditure transactions of provincial and territorial governments and their special funds. These operations are accounted for separately by provincial and territorial governments, but perform functions generally related to the activities of government.

For more detailed information on the revenue and expenditure classifications which appear in the various tables of this publication, the reader is referred to the occasional publication The Canadian System of Government Financial Management Statistics (Catalogue 68-506).

Table 1 shows "gross" general revenue by source while Table 2 shows "gross" general expenditure by function.

Tables 3 and 4 — Reconciliation of Provincial Estimated Revenue and Expenditure with Estimated Gross General Revenue and Expenditure

In order to achieve a measure of inter-provincial comparability certain adjustments have been made. These tables are included to explain the difference between current revenue and expenditure (as presented in provincial and territorial estimates and budget speeches) and gross general revenue and gross general expenditure appearing in this publication.

Table 5 — Economic Classification of Estimated Gross General Revenue

This table classifies the estimated gross general revenue (presented in Table 1) by the economic sources used in the System of National Accounts. The economic sources of government revenue used in the system are direct and indirect taxes, transfers from persons, business and other levels of government, and investment income. For further information on these sources please refer to publication 68-207 Provincial Government Finance — Revenue and Expenditure.

Tableaux 1 et 2 — Revenus prévisionnels généraux bruts et dépenses prévisionnelles générales brutes

Ces tableaux comprennent l'ensemble des revenus de nature capitale et de nature courante des ministères provinciaux et territoriaux et de certains fonds administratifs ou spéciaux. Ces opérations sont prises en compte séparément par les administrations provinciales et territoriales mais les fonctions sont généralement reliées aux activités de l'administration publique.

Pour plus de détails sur le classement des revenus et des dépenses qui figurent dans les tableaux du présent bulletin, le lecteur est prié de consulter la publication qui s'intitule; Le système canadien des statistiques de la gestion financière des administrations publiques (n° 68-506F au catalogue).

Le tableau 1 représente les revenus généraux "bruts" par source tandis que le tableau 2 représente les dépenses générales "brutes" par fonction.

Tableaux 3 et 4 — Rapprochement des revenus prévisionnels généraux bruts et des dépenses prévisionnelles générales brutes avec les revenus et les dépenses prévisionnels provinciaux

Afin de pouvoir comparer les provinces, il a fallu procéder à certains ajustements. Ces tableaux illustrent la différence entre les revenus et les dépenses courantes (figurant dans les estimations provinciales et territoriales et les discours du budget) et les revenus généraux bruts et les dépenses générales brutes de la présente publication.

Tableau 5 — Classification économique des revenus prévisionnels généraux bruts

Ce tableau classe les prévisions de revenus généraux bruts (tel que présentés au tableau 1) d'après la source économique, selon la comptabilité nationale. Les sources économiques des revenus gouvernementaux utilisées dans la comptabilité nationale sont les impôts directs et indirects, les transferts provenant des particuliers, des entreprises et des autres niveaux de l'administration publique et les revenus de placements. Pour plus de détails sur ces sources, on peut consulter le bulletin intitulé: Finances publiques provinciales — Revenus et dépenses (n° 68-207F au catalogue).

Table 6 - Economic Classification of Estimated Gross General Expenditure

This table classifies the estimated gross general expenditure (presented in Table 2) by economic objects used in the System of National Accounts. The economic objects of government expenditure used in the system are goods and services (including salaries and wages) and transfers to persons, business and other levels of government. For further information on these objects, please refer to publication Catalogue 68-207 Provincial Government Finance - Revenue and Expenditure.

Table 7 - Historical Summary of Gross General Revenue and Expenditure

This table presents estimated data for the current year, revised estimates for the previous year and actual data for three years. These data show gross general revenue by source and gross general expenditure by function for each province and territory and at Canada total.

Estimated data are obtained from the present publication and supplementary information, while actual amounts are to be found in the publication entitled Provincial Government Finance - Revenue and Expenditure (Catalogue 68-207).

Tax Credits

In 1973-74, the Financial Management Series treated tax credits deducted from income tax as expenditure on housing. This position was revised in 1974-75: the function Social Welfare (sub-function tax credits and rebates) now includes property tax, sales tax and pensioner credits deducted from income tax. This sub-function also includes subsidies in reduction of property taxes.

Tableau 6 - Classification économique des dépenses prévisionnelles générales brutes

Ce tableau classe les prévisions des dépenses générales brutes (présentées au tableau 2) par poste économique, selon la comptabilité nationale. Les postes des dépenses de l'État utilisés dans la comptabilité nationale sont les biens et services (y compris les rémunérations), et les transferts aux particuliers, aux entreprises et aux autres niveaux de l'administration publique. Pour plus de détails sur ces postes on peut consulter le bulletin intitulé: Finances publiques provinciales - Revenus et dépenses (n° 68-207 au catalogue).

Tableau 7 - Sommaire chronologique des revenus et des dépenses généraux bruts

Ce tableau regroupe les données estimatives pour l'année courante, les prévisions révisées pour l'année précédente et les données réelles pour trois années. Ces données représentent les revenus généraux bruts par source et les dépenses générales brutes par fonction, par province et par territoire et pour l'ensemble du Canada.

Les estimations proviennent de la présente publication et d'information supplémentaire, tandis que les données réelles sont extraites de la publication intitulée: Les finances publiques provinciales - Revenus et dépenses (n° 68-207 au catalogue).

Les crédits d'impôts

En 1973-74, la série de la Gestion financière traitait provisoirement les crédits d'impôt sur le revenu comme une dépense sur le logement. Cette position a été révisée pour 1974-75: les crédits d'impôt sur le revenu en regard de l'impôt foncier, de la taxe de vente et les crédits auxquels ont droit les personnel âgées sont regroupés sous la fonction Bien-être (sous-fonction crédits et réductions d'impôt). Cette sous-fonction comprend également les subventions aux fins d'alléger le fardeau de l'impôt foncier.

Quebec Pension Board

The data in this report for the province of Quebec includes the following revenues and expenditures of the Quebec Pension Board established by the province in 1965.

Revenue and Expenditure, Fiscal Year Ended March 31

| <u>Revenue</u> | <u>1979</u> | <u>1978</u> |
|--------------------------------|-------------|-------------|
| Universal pension plan levies. | 670,000 | 619,000 |
| Interest | 420,000 | 367,200 |
| Total | 1,090,000 | 986,200 |

Expenditure

| | | |
|---|---------|---------|
| Social welfare — Universal pension plans. | 474,000 | 395,200 |
| Excess of revenue over expenditure. | 616,000 | 591,000 |

The only transactions, included at the provincial level (except Quebec) as universal pension plan expenditures, are the contributions of provincial governments as employers to the Canada Pension Board. Being a federal agency, the revenues and expenditures are included in the federal government universe.

For the purpose of presenting provincial data on a comparable basis, the following statement shows the position of the province of Quebec in the case where the Quebec Pension Board would have been considered a sub-sector of the provincial government universe instead of part of the universe.

Revenue and Expenditure, Fiscal Year Ended March 31

| | <u>1979</u> | <u>1978</u> |
|-------------------------------------|-------------|-------------|
| Revenues | 12,912,400 | 11,686,500 |
| Expenditures | 14,282,300 | 13,021,200 |
| Excess of revenue over expenditure. | — 1,369,900 | — 1,355,700 |

Régie des rentes du Québec

Les données de la province de Québec figurant dans la présente publication comprennent les revenus et les dépenses suivants de la Régie des rentes du Québec, organisme créé par la province en 1965.

Revenus et dépenses, l'année financière terminée le 31 mars

| <u>Revenus</u> | <u>1979</u> | <u>1978</u> |
|---|-------------|-------------|
| Prélèvements au titre des régimes de pension universel. | 670,000 | 619,000 |
| Intérêts | 420,000 | 367,200 |
| Total | 1,090,000 | 986,200 |

Dépenses

| | | |
|--|---------|---------|
| Bien-être social — Régimes de pension universel. | 474,000 | 395,200 |
| Excédent des revenus sur les dépenses. | 616,000 | 591,000 |

Les seules transactions incluses au niveau provincial (sauf Québec) comme dépenses pour les régimes de pension universel, sont les contributions des gouvernements provinciaux à titre d'employeur au Régime de pensions du Canada. Étant un organisme fédéral, les revenus et les dépenses sont inclus dans l'univers gouvernemental fédéral.

Dans le but de présenter une situation comparable entre les provinces, le tableau suivant présente la position de la province de Québec dans le cas où la Régie des rentes du Québec serait considérée comme un sous-secteur de l'univers gouvernemental provincial plutôt que partie intrégrante de l'univers.

Revenus et dépenses, l'année financière terminée le 31 mars

| | <u>1979</u> | <u>1978</u> |
|---------------------------|-------------|-------------|
| Revenus généraux bruts .. | 12,912,400 | 11,685,500 |
| Dépenses générales brutes | 14,282,300 | 13,021,200 |
| Revenus moins dépenses .. | — 1,369,900 | — 1,355,700 |

STATISTICAL TABLES

TABLEAUX STATISTIQUES

TABLE 1. Estimated Gross General Revenue for the Fiscal Year Ending March 31, 1979

Introduction

This publication presents the revenues and expenditures of the governments of each of the Canadian provinces and territories in the form of government financial management statistics. The primary objective of the publication is to meet the needs of users of financial information pertaining to the activities of these governments by converting the idiosyncratic data produced by each government into standardized statistics which are compatible as between these governments (and also with those of other levels of government produced by the Public Finance Division of Statistics Canada) and are consistent from one reference period to another.

The Financial Management Statistics System

The concepts and classifications underlying this statistical system are described in detail in the publication "The Canadian System of Government Financial Management Statistics" (Catalogue (68-506). Canadian governments at all three levels - federal, provincial and local - display much the same organizational structure - a legislature to which is subordinated a central core of departments to which, in turn, are attached numbers of agencies with varying degrees of autonomy. However, this general similarity of structure disappears when a detailed examination is made. Similarly-named entities perform quite different roles in different governments; services provided by a department in one government are provided by an agency in a second and are not provided at all in a third; and, while most agencies provide "government-type" services, others provide goods or services which in other jurisdiction could be, and often are, provided by non government commercial entities. Furthermore, since most government finance reports are designed to show administrative accountability and hence are closely related to organizational structures, the raw data contained in these reports are practically useless for any study which seeks to relate the financial activities of one government to those of another.

The Canadian System of Government Financial Management Statistics seeks to overcome the lack of homogeneity in raw government financial information at the provincial/territorial level in the following ways:

Introduction

Cette publication présente les recettes et dépenses publiques de chaque province ou territoire du Canada sous forme de statistiques de la gestion financière des gouvernements. Elle vise d'abord à répondre aux besoins des utilisateurs en renseignements financiers relatifs aux activités de ces gouvernements en transformant les données particulières produites par chacun en statistiques normalisées pour les divers gouvernements (compatibles avec celles produites par la Division des finances publiques de Statistique Canada sur d'autres niveaux de gouvernement) et comparables d'une période de référence à une autre.

Système statistique de la gestion financière

Les concepts et classifications qui sous-tendent ce système statistique sont décrits en détail dans la publication "Le système canadien des statistiques de la gestion financière" (no 68-506 au catalogue). Les trois paliers de gouvernement au Canada - fédéral, provincial et local - se ressemblent beaucoup; ils comprennent une assemblée législative dont relève un groupe central de ministères ou services auxquels se rattachent une grande quantité d'organismes jouissant de divers degrés d'autonomie. Cependant, cette similitude de structure ne soutient pas un examen détaillé. Des ministères ou services ayant des noms semblables diffèrent sensiblement dans le cas de certains gouvernements; certains services fournis par un ministère dans une province le sont par un organisme dans une autre et ne le sont pas dans une troisième; de plus, bien que la plupart des organismes assurent des services "publics", d'autres organismes fournissent des biens ou services qui, ailleurs, pourraient être fournis, et le sont souvent, par l'entreprise privée. Comme la plupart des rapports financiers des gouvernements font état de la responsabilité administrative et, par conséquent, suivent de près la structure de l'organisation, les données qu'ils renferment sont presque inutiles pour toute étude visant à comparer les activités financières de divers gouvernements.

Le système canadien des statistiques de la gestion financière cherche à corriger le manque d'homogénéité entre les renseignements financiers fournis par les diverses provinces ou territoires par les moyens suivants:

The government universe is divided in two parts - general government and government enterprises. The general government consists of:

Departments of government;

special funds (see "Appendix" for the list of special funds included in this report):

administrative and regulatory funds which perform functions similar to those of government departments;

agencies engaged in "industrial" or "commercial" activities, primarily to service the requirements of their own governments;

agencies engaged primarily in the channelling of funds from one level of government to another or among organizations at the same level of government, e.g., bodies established by provincial legislation to help finance the capital programs of municipalities and school boards;

Workers' Compensation Boards;

government-owned institutions such as those engaged in education, health and welfare services or administration of justice, e.g. agricultural schools, residences for handicapped persons, gaols, etc.;

Quebec Pension Plan;

non-trusteed public service pension plans because their funds constitute an integral part of the consolidated revenue fund or which are otherwise available to the government in the financing of its operations;

working capital funds.

All entities classified to general government are consolidated into a single statistical unit for each government.

Revenues of each unit are classified by source and expenditures by function or purpose, while assets and liabilities conform with normal accounting classifications.

A government enterprise is an organized entity, usually corporate, established by a government to produce goods or services for sale on the open market at prices related to costs (this relationship being ascertainable from its own independent system of accounts), which has relatively autonomous management of its affairs and is staffed by other than public servants, though certain staff benefit schemes, e.g., superannuation, may be integrated with those of the public service of the parent government. The enterprises are classified by parent-government and by Standard Industrial Classification. Financial statistics classifications for enterprises generally accord with those of commercial accounting.

L'univers est subdivisé en deux parties: l'univers gouvernemental et celui des entreprises publiques. L'univers gouvernemental comprend:

les ministères;

les fonds spéciaux (voir "la liste" des fonds spéciaux en annexe):

fonds administratifs et réglementaires dont les fonctions sont semblables à celles des ministères;

organismes ayant une activité "industrielle" ou "commerciale" pour répondre avant tout aux besoins des gouvernements dont ils relèvent;

organismes dont l'activité principale est l'acheminement de fonds d'un échelon de gouvernement à un autre ou entre des organismes d'un même échelon, comme ceux créés par des lois provinciales pour aider au financement des investissements des municipalités et des conseils scolaires;

commissions des accidents du travail;

les établissements appartenant à des gouvernements comme ceux qui s'occupent de l'éducation, de la santé et du bien-être social, ou de l'administration de la justice. Dans cette catégorie, entrent les écoles d'agriculture, les résidences pour personnes handicapées, les prisons, etc.

Le régime des rentes du Québec;

les régimes de pensions de la Fonction publique non constitués en fiducie parce que leurs fonds forment une partie intégrante du fonds consolidé du revenu ou sont de toute autre manière à la disposition du gouvernement pour le financement de ses activités;

les fonds de roulement.

Toutes les entités classées dans l'univers gouvernemental sont groupées en une seule unité statistique pour chaque gouvernement.

Les recettes de chaque unité sont classés par source et les dépenses par fonction ou but, tandis que les éléments d'actif et de passif suivent les classifications comptables normales.

Une entreprise publique est une personne morale, habituellement une société, créée par un gouvernement pour produire des biens ou services en vue de leur vente sur le marché libre à des prix établis en fonction des coûts (cela peut être vérifié à partir de son propre système indépendant de comptes), qui gère ses propres affaires de façon relativement autonome et dont le personnel n'est pas constitué de fonctionnaires, bien que certains avantages sociaux, comme la pension de retraite, puissent être intégrés à ceux du gouvernement dont elle relève. Les entreprises sont classées selon le gouvernement dont elles relèvent et les catégories de la Classification des activités économiques. La statistique financière des entreprises correspond généralement à la comptabilité commerciale.

While the foregoing outlines the bases on which the financial management system rests, the reader is urged to refer to the descriptive publication mentioned above to obtain the more detailed knowledge which is a prerequisite for the full comprehension and use of the statistics produced in accordance with this system. The full range of these statistical series is listed on the rear cover of the present publication.

The National Accounts Statistical System

A second national standardized system for the production of financial statistics of Canadian governments is contained in the framework of the Canadian System of National Accounts. While the financial management system depicts the expenditures made by government to discharge its functions, the relative importance of the different types of revenue raised to defray these expenditures, the means used to finance the deficit between revenue and expenditure or to dispose of any surplus of revenue over expenditure and the resulting financial situation of government; the economic analysis system is concerned with the economic effects of government activity. Although there are significant differences between the two systems in concepts and, particularly, in classifications, it is possible, as is shown in this publication, to cross-classify government financial data in economic terms. But, just as the resulting financial management statistics differ significantly from the estimates or public accounts from which they are derived, so the economic analysis statistics differ from the national income and expenditure accounts.

Coverage, Sources and Validity

The present publication covers the general government universe of each province and territory on an all-inclusive basis except for certain institutions for which complete financial reports are unavailable. These institutions are incorporated only to the extent of their financial transactions with their present governments; certain very minor revenues which these institutions obtain from other sources are omitted from the publication as are detailed analyses of their expenditures.

The financial statistics in this publication are derived from information contained in the estimates and budget speeches of the governments and from estimates of the special funds' financial transactions as compiled by The Public Finance Division. Additional detail is obtained in a few instances from correspondence with provincial and territorial authorities. The co-operation of provincial and territorial government officials is gratefully acknowledged.

The main tables in this publication have been reviewed by officials of the governments to which the data relates but final responsibility for the validity of the statistics remains with the Provincial Government Section of the Public Finance Division of Statistics Canada.

Même si nous venons d'esquisser les bases du système de gestion financière, nous prions le lecteur de se reporter à la publication mentionnée plus haut afin de mieux connaître ces bases, une condition essentielle à la parfaite compréhension et à l'utilisation des statistiques produites conformément à ce système. Vous trouverez la liste complète de ces séries statistiques sur la partie arrière de la couverture de cette publication.

Système statistique des comptes nationaux

Le système canadien de la comptabilité nationale est un deuxième système national normalisé pour la statistique financière des gouvernements canadiens. Alors que le système de la gestion financière présente les dépenses effectuées par les gouvernements pour s'acquitter de leurs fonctions, l'importance relative des différentes sources de recettes perçues pour assumer ces dépenses, les moyens utilisés pour financer le manque de recettes par rapport aux dépenses ou pour disposer l'excédent des recettes sur les dépenses et la situation financière finale des gouvernements; le système d'analyse économique s'intéresse, pour sa part, aux incidences économiques de leurs activités. En dépit de différences conceptuelles sensibles entre les deux systèmes, principalement dans les classifications, il est possible, comme le démontre cette publication, de recouper les données financières en termes économiques. Mais, tout comme les statistiques sur la gestion financière diffèrent considérablement des budgets ou des comptes publics dont elles sont dérivées, les résultats de l'analyse économique sont différents de ceux des comptes nationaux des recettes et dépenses.

Champ d'observation, sources et validité

La présente publication englobe toutes les activités gouvernementales de chaque province ou territoire, sauf certaines institutions pour lesquelles il n'existe pas de rapports financiers complets. Nous n'avons tenu compte de ces institutions que pour leurs transactions financières avec le gouvernement dont elles relèvent; cette publication ne prend pas en compte certaines recettes très faibles provenant d'autres sources et n'analyse pas leurs dépenses en détail.

Les statistiques financières de cette publication sont tirées de renseignements contenus dans les Prévisions et les discours du budget des gouvernements et des transactions financières des fonds spéciaux estimées par la Division des finances publiques. Dans quelques cas, des détails supplémentaires ont été obtenus directement des autorités provinciales ou territoriales. Nous remercions les fonctionnaires des provinces et territoires de la collaboration qu'ils nous ont accordée.

Les principaux tableaux de cette publication ont été vérifiés par les fonctionnaires compétents des gouvernements, mais c'est la Section des administrations provinciales, Division des finances publiques, Statistique Canada, qui a la responsabilité définitive des statistiques.

Revision of the Financial Management Statistics System

The most recent publication describing the Financial Management Statistics System (Catalogue 68-506) was issued in September 1972; amendments were issued in April 1974. Public Finance Division commenced a review of the System in 1979 and expects to issue a revised publication later in 1981. While this review has concentrated on strengthening the conceptual framework of the System, developments in government operations in the decade now ended together with changes in user requirements have necessitated some modifications to the revenue and expenditure classifications.

While no changes have been made to individual revenue classifications, "Taxes" have been re-aligned into five groups - "Income Taxes", "Property and Related Taxes", "Consumption Taxes", "Health and Social Insurance Levies", and "Miscellaneous". This arrangement is more logical than that previously employed which appeared to give undue prominence to certain relatively minor categories.

While the changes made to expenditure classifications are more noticeable they should not affect the continuity of the series except in one relatively minor instance.

The function "Social Welfare" has been renamed "Social Services" and re-structured to provide greater clarity. It now comprises the sub-functions "Social Security", "Labour Force Plans", "Family Allowances", "Veterans Benefits", "Social Welfare", "Tax Credits and Rebates", and "Other Social Services".

Because it has become increasingly difficult to distinguish between expenditures related to conservation and those aimed at development, the two functions, "National Resources" and "Agriculture, Trade and Industry, and Tourism", have been combined into a single function, "Resource Conservation and Industrial Development". All the sub-functions of both former functions are allocated to the new function.

The function "Supervision and Development of Regions" has been re-named more appropriately "Regional Planning and Development". While the overall concept remains unchanged, four sub-functions - "Planning and Zoning", "Community Development", "Regional Development" and "Other" - are also now identified.

The sub-function "Regulatory Services" has been re-defined and re-named "Regulatory Measures". Previously, all expenditures related to regulatory activities were assigned to this classification. Such assignment, however, is now recognized to conflict with one of the basic principles of the System under which an expenditure is classified in terms of the service thereby provided. As a consequence, where the

Révision du Système des statistiques de la gestion financière

La dernière publication décrivant le Système des statistiques de la gestion financière (no 68-506 au catalogue) remonte à septembre 1972, bien que des modifications aient été apportées en avril 1974. La Division des finances publiques a entrepris une révision du système en 1979 et compte en publier une nouvelle version en 1980. Quoique cette révision vise surtout à donner plus de rigueur au cadre conceptuel du système, l'évolution des activités gouvernementales au cours de la dernière décennie, accompagnée des changements qu'ont connus les besoins des utilisateurs, a rendu nécessaire la modification de la structure des recettes et des dépenses.

Aucune modification n'a été apportée aux rubriques portant sur les recettes, mais les "impôts" sont maintenant divisés en cinq groupes: "impôts sur le revenu", "impôts fonciers et impôts connexes", "taxes à la consommation", "cotisations aux régimes d'assurance-maladie et d'assurance sociale" et "impôts divers". Cette structure est plus logique que la précédente où certaines fonctions de moindre importance semblaient occuper une place prépondérante.

Bien que les modifications effectuées au chapitre des dépenses soient plus nombreuses, la continuité des séries ne devrait pas être menacée, sauf dans un cas d'assez peu d'importance.

La fonction "bien-être social" s'appelle maintenant "services sociaux" et est restructurée en vue d'une meilleure clarté. On y trouve les sous-fonctions "sécurité sociale", "régimes concernant la population active", "allocations familiales", "prestations aux anciens combattants", "bien-être social", "crédits et dégrèvements d'impôt" et "autres services de bien-être social".

Comme il est de plus en plus difficile de distinguer les dépenses affectées à la conservation de celles destinées au développement, les fonctions "ressources naturelles" et "agriculture, commerce et industrie, et tourisme" ont été groupées pour former la fonction "conservation des ressources naturelles et développement de l'industrie". Toutes les sous-fonctions des deux anciennes fonctions font maintenant partie de la nouvelle.

La fonction "surveillance et mise en valeur des régions" est maintenant appelée, de façon plus appropriée, "planification et aménagement des régions". Le concept général n'est pas modifié, mais quatre sous-fonctions sont maintenant définies: "urbanisme et zonage", "aménagement des agglomérations urbaines", "aménagement des régions" et "autres".

La sous-fonction "services de réglementation" a été redéfinie et s'intitule maintenant "mesures de réglementation". Auparavant, toutes les dépenses affectées aux activités de réglementation figuraient sous cette rubrique. Toutefois, on a constaté que cette façon de procéder dérogeait à l'un des principes fondamentaux du système voulant qu'une dépense soit classée selon le service auquel elle est affectée. Par conséquent, lorsque l'objet d'un règlement ou d'un program-

purpose of a particular regulation or regulatory program is to protect or foster a particular activity or industry, expenditures on the regulation or program are now classified under the same function as the related activity or industry.

Expansion of Information on Expenditure (68-205)

The introduction of a fully computerized system to process provincial revenue and expenditure data makes possible the presentation of expenditure data in Tables 2 and 6 of this publication at the same level of detail (generally, the sub-function) as in the "Actual" series (Catalogue 68-207).

Québec Pension Board

The data in this report for the province of Québec includes the revenues and expenditures of the Québec Pension Board, established by the province in 1965. (See Text Table V).

The only transactions, included at the provincial level (except Québec) as universal pension plans expenditures, are the contributions of provincial governments as employers to the Canada Pension Board. Being a federal agency, the revenues and expenditures are included in the federal government universe.

Text Table VI shows the position of the province of Québec in the case where the Québec Pension Board would have been considered a sub-sector of the provincial government universe instead of part of the universe.

Inter-Provincial Comparability

The "gross general" concept of revenue and expenditure as applied in this publication provides a measure of inter-provincial comparability but only at the general government level. Because of the varying importance of provincial government enterprises in the activities of the provincial public sub-sector in the ten provinces and the two territories and, even more, because of the divergences in the allocation of responsibilities between provincial and local governments among the provinces, complete comparability can only be achieved when provincial government and provincial enterprise operations are integrated and provincial and local government transactions are consolidated. This consolidation of the revenues and expenditures of the provincial and local government levels into a combined provincial-local statistical universe is presented in the Statistics Canada publication *Consolidated Government Finance* (Catalogue 68-202) in which the inter-level transactions are eliminated.

me réglementaire en particulier est de protéger ou d'encourager une certaine activité ou une certaine industrie, les dépenses consacrées au règlement ou au programme sont classées sous la fonction représentant l'activité ou l'industrie concernées.

Élargissement des renseignements sur les dépenses (68-205)

Grâce au traitement entièrement informatisé des données provinciales sur les recettes et les dépenses, il est désormais possible de présenter les données sur les dépenses des tableaux 2 et 6 de la présente publication au même niveau de ventilation (généralement, la sous-fonction) que celui des séries "réelles" (no 68-207 au catalogue).

Régie des rentes du Québec

Les données de la province de Québec figurant dans la présente publication comprennent les recettes et des dépenses de la Régie des rentes du Québec, organisme créé par la province en 1965. (Voir le tableau explicatif V).

Les seules transactions incluses au niveau provincial (sauf Québec) comme dépenses pour les régimes universals de rentes, sont les contributions des gouvernements provinciaux à titre d'employeur au Régime de pension du Canada. Étant un organisme fédéral, les recettes et les dépenses sont inclus dans l'univers gouvernemental fédéral.

Le tableau explicatif VI présente la position de la province de Québec dans le cas où la Régie des rentes du Québec serait considérée comme une sous-section de l'univers gouvernemental provincial plutôt que partie intégrante de l'univers.

Comparabilité interprovinciale

Le concept des recettes et des dépenses "générales brutes" tel qu'il s'applique ici fournit une mesure de la comparabilité inter-provinciale, mais au niveau de l'univers gouvernemental seulement. Étant donné que l'importance des entreprises publiques provinciales dans les activités du sous-secteur public provincial des dix provinces et des deux territoires varie, et plus encore par suite des divergences dans l'attribution des responsabilités entre les gouvernements provinciaux et les administrations locales d'une province à l'autre, on ne peut obtenir une comparabilité parfaite que lorsque les opérations des gouvernements provinciaux et de leurs entreprises sont intégrées et lorsque les transactions publiques provinciales et locales sont consolidées. Cette consolidation des recettes et des dépenses publiques provinciales et locales en un univers statistique combiné provincial-local, est exposé dans la publication de Statistique Canada intitulée *Les Finances Publiques Consolidées* (numéro 68-202 au catalogue), et dans laquelle les opérations entre divers niveaux sont éliminées.

Explanatory Comments

Tables 1 and 2 Gross General Revenue and Expenditure

These tables include the current and capital revenue and expenditure transactions of the provincial government universe.

In order to achieve a measure of inter-provincial comparability, certain adjustments have been made to the figures shown in the provincial accounts. Reconciliations of "gross general" revenue and expenditure with provincial accounts are found in Tables 3 and 4. The adjustments are explained more fully in the commentary to those tables.

Tables 3 and 4 Reconciliation of Gross General Revenue and Expenditure with Provincial Accounts

These tables are included to explain the difference between current and capital revenue and expenditure as presented in provincial and territorial accounts, and gross general revenue and expenditure as compiled for the financial management series.

The revenues and expenditures of the special funds are accounted for separately and are not included in provincial or territorial revenues and expenditures despite the fact that the agencies in question perform functions that are really of a governmental nature. For purposes of establishing gross general revenue and expenditure, the transactions of these funds are added to budgetary transactions.

Because of variations in the extent to which provincial and territorial governments deduct amounts from revenue and expenditure in their financial statements, adjustments also are made in the series to reverse all of these deductions and to arrive at "gross" revenue and expenditure.

The trading operations of liquor boards are treated in the financial management series as enterprises and only their remitted trading profits are included in provincial or territorial revenues. In some provinces, however, liquor boards also carry out regulatory or control functions and derive revenue from these activities. This revenue, generally in the form of licences and permits, and the related expenditure are considered to be general government revenue and expenditure. Therefore, they represent an adjustment to the revenue and expenditure presented in the provincial government financial statements.

A uniform approach to the treatment of working capital funds in the financial management series results in adjustments to both revenue and expenditure. This compensates for the different presentation of such funds in the provincial and territorial accounts.

An attempt is also made to apply a consistent approach to recoveries of expenditure and refunds of revenue. A number of items regarded by the provinces

Commentaires explicatifs

Tableaux 1 et 2 Recettes et dépenses générales brutes

Ces tableaux comprennent les recettes et les dépenses ordinaires et de nature capitale de l'univers des gouvernements provinciaux.

Dans un souci de comparabilité interprovinciale, on a apporté certains ajustements aux chiffres figurant dans les comptes provinciaux. Les rapprochements des recettes et des dépenses "générales brutes" des comptes provinciaux se trouvent aux tableaux 3 et 4. Les ajustements sont expliqués plus en détail dans les commentaires de ces tableaux.

Tableaux 3 et 4 Rapprochement des recettes et des dépenses générales brutes avec celles des comptes provinciaux

On a inclus ces tableaux pour expliquer la différence entre les recettes et les dépenses ordinaires et de nature capitale tels qu'ils figurent dans les comptes des provinces et des territoires, et les recettes et dépenses générales brutes établis pour les séries de la gestion financière.

Les recettes et les dépenses des fonds spéciaux sont comptabilisés séparément et ne sont pas pris en compte dans les recettes et les dépenses des gouvernements provinciaux ou territoriaux en dépit du fait que les activités des organismes en question sont réellement de nature gouvernementale. Pour établir les recettes et les dépenses générales brutes, on ajoute les opérations de ces fonds aux opérations budgétaires.

Les sommes que les gouvernements provinciaux et territoriaux déduisent dans leurs états financiers des recettes et des dépenses pouvant varier, on apporte également des ajustements aux séries pour annuler toutes ces déductions et obtenir les recettes et les dépenses "brutes".

Les activités commerciales des régies des alcools sont considérées dans les séries de la gestion financière comme des entreprises publiques et seuls leurs profits d'exploitation remis figurent dans les recettes provinciales ou territoriales. Cependant, dans certaines provinces, les régies des alcools ont également des fonctions réglementaires ou de contrôle d'où elles tirent des recettes. Ces dernières, généralement sous la forme de droits et de permis, ainsi que les dépenses correspondantes, sont considérées comme des recettes et des dépenses de l'univers gouvernemental et constituent donc un ajustement aux recettes et aux dépenses figurant dans les états financiers des gouvernements provinciaux.

Une approche uniforme dans le cas des fonds de roulement dans les séries de la gestion financière a donné lieu à des ajustements aux recettes et aux dépenses pour compenser la différence de présentation de ces fonds dans les comptes provinciaux et territoriaux.

On essaie également d'utiliser une approche homogène dans le cas des recouvrements de dépenses et des remboursements de recettes. Un certain nombre de postes considérés

as revenue or expenditure are considered to represent recoveries of current and prior year expenditures or refunds of current year revenues. Consequently, they are excluded from gross general revenue and expenditure.

Non-revenue and surplus receipts and non-expenditure and surplus payments represent items which are not regarded as provincial government revenue and expenditure transactions in this series. They also include such items as repayments of loans and advances, revenues collected on behalf of other jurisdictions, purchases and sales of investments, loans and advances and other surplus account transactions.

The deduction of intragovernment transactions represents the elimination of transactions among the component parts of the general government statistical universe for each province. Departmental expenditures included in the revenues of special funds and vice-versa, revenues of one special fund treated as expenditure in another special fund, and transfers of funds between departments would all result in the duplication of revenue and expenditure when these entities are combined to form the statistical universe for any particular province. It, therefore, becomes necessary to identify and eliminate these interfund or intra universe transactions.

Table 5 Economic Classification of Gross General Revenue

This table classified the gross general revenue of the financial management series by economic sources. The sources of government revenue for economic purposes are direct taxes on persons and business, indirect taxes, other current transfers from persons, transfers from other levels of government, investment income and other.

Direct taxes. Direct taxes include personal and corporation income taxes, payroll tax, succession duties and the levies imposed on logging and mining profits. Employee contributions to non-trusteed pension plans, contributions to the Québec Pension Board and Workmen's Compensation Board assessments are also considered as direct taxes - persons.

Indirect taxes. Indirect taxes encompass sales taxes, motor fuel taxes, insurance premiums, capital and place of business taxes, amusement taxes and real and personal property taxes. Privileges, licences and permits purchased by business entities such as motor vehicles licences, natural resource exploration permits, etc., are also regarded as indirect taxes.

Other Current Transfers from Persons. Transfers from persons consist of health insurance premiums, personal motor vehicle permits and licences, and other licences and permits such as fishing, hunting and

par les provinces comme des recettes ou des dépenses sont considérés comme des recouvrements des dépenses de l'année courante ou comme des remboursements des recettes de l'année courante, et sont de ce fait exclus des recettes et des dépenses générales brutes.

Les entrées de fonds qui ne sont pas des recettes et les entrées au titre de l'excédent, ainsi que les paiements qui ne sont pas des dépenses et ceux qui sont prélevés sur l'excédent, constituent les postes qui ne sont pas considérés comme des recettes et des dépenses des gouvernements provinciaux dans cette série; elles comprennent notamment les remboursements l'emprunts et d'avances, les recettes recueillis pour le compte d'autre autorités, les achats et les ventes de placements, les prêts et avances et les autres opérations au titre du compte de l'excédent.

La déduction des transactions entre les composantes du gouvernement consiste à éliminer les opérations entre les éléments constitutifs de l'univers statistique gouvernemental de chaque province. Les dépenses d'un ministère comprises dans les recettes d'un fonds spécial et inversement, les recettes d'un fonds spécial considérés comme dépenses dans un autre fonds spécial, les transferts de fonds entre les ministères; tous ces éléments amèneraient un double comptage des recettes et des dépenses lorsque l'on regroupe ces entités pour former l'univers statistique d'une province donnée. Il devient donc nécessaire d'isoler et d'éliminer ces opérations entre fonds ou à l'intérieur de l'univers.

Tableau 5 Classification économique des recettes générales brutes

Ce tableau classe les recettes générales brutes des séries de la gestion financière selon les sources économiques. Les sources des recettes publiques aux fins économiques sont les impôts directs des particuliers et des entreprises, les impôts indirects, les autres transferts courants des particuliers, les transferts d'autres niveaux d'administration publique, les revenus de placements et autres.

Impôts directs. Les impôts directs comprennent les impôts sur le revenu des particuliers et des corporations, l'impôt sur la feuille de paie, les droits successoraux et les droits imposés sur les bénéfices forestiers et miniers. Les cotisations des employés aux régimes de pension gérés par le gouvernement, les cotisations au Régimes des rentes du Québec et les versements à la Caisse d'indemnisation des accidents du travail sont également considérés comme des impôts directs.

Impôts indirects. Les impôts indirects comprennent les taxes de vente, les taxes sur les carburants, les taxes sur le revenu de primes des compagnies d'assurance, les taxes sur le capital et les taxes d'affaires, les taxes sur les spectacles ainsi que les impôts sur la propriété foncière et personnelle. Les privilèges, droits et permis achetés par les entités commerciales, tels que les permis pour véhicules automobiles, les permis portant sur l'exploitation des ressources naturelles, etc., sont également considérés comme des impôts indirects.

Autres transferts courants des particuliers. Les transferts des particuliers comprennent les primes personnels pour véhicules automobiles et les droits et autres permis tels que les permis de pêche, de chasse et de mariage. Les amendes et

marriage licences. Fines and penalties also fall into this economic category.

Transfers from Other Levels of Government. This category includes both general and specific purpose transfers from federal and local governments. The provincial share of federal estate tax, the tax on undistributed income and income tax on privately owned public utilities are classified as transfer payments at the provincial government level.

Investment income. Interest, dividends and profits on foreign exchange, royalties and the remitted profits of government enterprises as well as liquor boards are included under this economic classification.

Other revenue. For example, sales of goods and services sales of land and fixed assets and other revenue items are not regarded as adding to production in the economic sense.

Table 6 Economic Classification of Gross General Expenditure

The objects of expenditure used in the economic classification are purchases of goods and services and transfer payments to persons, business and other levels of government.

Purchases of Goods and Services This classification includes all current expenditures of government on such salaries and wages, materials and supplies, travelling expenses, professional services, purchases of land, write-offs of bad debts and other final expenditures. For purposes of this publication, transfer payments to public hospitals are also treated as purchases of goods and services.

Transfers to Persons Transfers to persons consist of payments to individuals and non-profit institutions for which no direct service is rendered by the recipients. Included in this latter group are universities, other post-secondary educational facilities and private non-commercial organizations and associations. For purposes of this publication, interest on the public debt is also treated as a transfer to persons.

Transfers to Business This category includes both subsidies for current operations and capital assistance payments made to business. Subsidies for current operations represent payments designed to make it possible for producers to stabilize or lower prices while capital assistance covers grants made to commercial enterprises to assist in the acquisition of new facilities or machinery and equipment. Homeowners' subsidies paid by provincial governments in Saskatchewan, Alberta and British Columbia are also included in transfers to business.

pénalités entrent également dans cette catégorie économique.

Transferts d'autres niveaux d'administration publique. Cette catégorie comprend les transferts à des fins générales et à des fins spécifiques du gouvernement fédéral et des administrations locales. La part provinciale de l'impôt fédéral sur les biens transmis par décès, l'impôt sur le revenu non distribué des sociétés et l'impôt sur le revenu des services privés d'utilité publique sont classés comme des transferts au niveau du gouvernement provincial.

Revenus de placements. Les intérêts, dividendes et le profit sur le change étranger, les redevances et les bénéfices déclarés des entreprises publiques ainsi que les régies des alcools figurent sous cette rubrique.

Autres recettes. Par exemple, les ventes de biens et de services les ventes de terrains et d'immobilisations ainsi que d'autres éléments de revenu dont on ne considère pas, au sens économique, qu'ils contribuent à la production.

Tableau 6 Classification économique des dépenses générales brutes

Les articles de dépenses utilisés dans la classification économique sont les achats de biens et de services et les paiements de transfert aux particuliers, aux entreprises et à d'autres niveaux d'administration publique.

Achats de biens et de services Sous cette catégorie figurent toutes les dépenses ordinaires des gouvernements pour des postes tels que les traitements et salaires, les matières et les fournitures, les dépenses de voyage, les services professionnels les achats de terrain, l'amortissement des créances douteuses et autres dépenses finales. Dans la présente publication les transferts aux hôpitaux publics sont également considérés comme des achats de biens et services.

Transferts aux particuliers Les transferts aux particuliers consistent en paiements aux particuliers et aux institutions sans but lucratif et en échange desquels les bénéficiaires ne rendent aucun service direct. Dans cette catégorie se trouvent les universités, les autres établissements d'enseignement post-secondaire ainsi que les organismes et associations privés non commerciaux. Dans la présente publication, l'intérêt sur la dette publique est également considéré comme un transfert à des particuliers.

Transferts aux entreprises Sous cette rubrique entrent les subventions au titre des opérations ordinaires et les paiements sous forme de subventions pour fins d'immobilisation versés aux entreprises. Les subventions au titre des opérations ordinaires représentent des paiements destinés à permettre aux producteurs de stabiliser ou d'abaisser leurs prix, cependant que les subventions pour fins d'immobilisation portent sur des transferts consentis aux entreprises commerciales pour les aider à acquérir de nouvelles installations ou des machines et du matériel. Les subventions aux propriétaires de maisons payées par les gouvernements de la Saskatchewan, de l'Alberta et de la Colombie-Britannique font également partie des transferts aux entreprises.

Transfers to Other Levels of Government Transfers to other levels of government consist of grants to local governments. The term "local government" refers to municipalities, local school boards and other municipally organized bodies such as conservation authorities.

Table 7 Historical Summary of Gross General Revenue and Expenditure

This table presents actual data for three years, estimated data for two years on gross general revenue by source and gross general expenditure by function for each province and territory. Data are also presented at the Canada total. Estimated amounts are obtained from the present publication while actual data are to be found in the publication entitled *Provincial Government Finance - Revenue and Expenditure* (Catalogue 68-207).

Transferts à d'autres niveaux d'administration publique Les transferts à d'autres niveaux d'administration publique comprennent les allocations aux administrations publiques locales. Par "administration publique locale", on entend les municipalités, les conseils scolaires locaux et autres formations organisées en municipalités, comme par exemple les offices de conservation.

Tableau 7 Sommaire chronologique des recettes et des dépenses générales brutes

Ce tableau regroupe les données réelles pour trois années et les données estimatives pour deux années en ce qui concerne les recettes générales brutes par source et les dépenses générales brutes par fonction, par province et par territoire et pour l'ensemble du Canada. Les estimations proviennent de la présente publication, tandis que les chiffres réels sont extraites de la publication intitulée - *Les Finances des gouvernements provinciaux - Recettes et dépenses* numéro 68-207 au catalogue.

Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

International Travel Section,
Financial Flows and Multinational Enterprises
Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 995-0847) or to the Statistics Canada reference centre in:

Subject/Objet Publication - Provincial Government Revenue and Expenditure (Estimates) No. 68-205 -
Publication - Local Government Finance - Preliminary and Estimates No. 68-203

Publication - Les finances publiques provinciales (Prévisions) N° 68-205 -
Publication - Les finances publiques locales (chiffres provisoires et prévisions) N° 68-203

Following an agreement between the director of Public Finance Division, M. Blauer and the assistant chief statistician, economic statistics field, S. Wells, the following publications have been cancelled: Provincial Revenue and Expenditure (Estimates) No. 68-205 - Local Government Finance (Preliminary and Estimates) No. 68-203. The data are now released on CANSIM (Canadian Socio-Economic Information Management System).

Suite à une entente entre le directeur de la Division des Finances Publiques, M. Blauer et l'assistant chef statisticien, secteur de la statistique économique, S. Wells, il a été convenu de canceller les publications suivantes: Les finances publiques provinciales (Prévisions) N° 68-205 - Les finances publiques locales (chiffres provisoires et prévisions) N° 68-203. Les données sont présentement diffusées sur CANSIM (Système Canadien d'information Socio-économique).

This method of dissemination not only permits an earlier release of the data, but permits their periodic revision as more current data become available. The move found favour with the Federal and Provincial Departments of Finance who use these data to benchmark the data they produce to estimate the initial Equalization Interim Payments.

Cette méthode de diffusion nous permet non seulement de diffuser les données plus rapidement, mais elle nous permet aussi de faire des révisions périodiques lorsque des données plus courantes nous parviennent. Ce changement a été appuyé par Finance Canada ainsi que les Ministères des Finances Provinciaux qui utilisent ces données pour les paiements de péréquation initiaux.

Introduction

This publication presents the revenues and expenditures of the governments of each of the Canadian provinces and territories in the form of government financial management statistics. The primary objective of the publication is to meet the needs of users of financial information pertaining to the activities of these governments by converting the idiosyncratic data produced by each government into standardized statistics which are compatible as between these governments (and also with those of other levels of government produced by the Public Finance Division of Statistics Canada) and are consistent from one reference period to another.

The Financial Management Statistics System

The concepts and classifications underlying this statistical system are described in detail in the publication “The Canadian System of Government Financial Management Statistics” (Catalogue (68-506). Canadian governments at all three levels - federal, provincial and local - display much the same organizational structure - a legislature to which is subordinated a central core of departments to which, in turn, are attached numbers of agencies with varying degrees of autonomy. However, this general similarity of structure disappears when a detailed examination is made. Similarly-named entities perform quite different roles in different governments; services provided by a department in one government are provided by an agency in a second and are not provided at all in a third; and, while most agencies provide “government-type” services, others provide goods or services which in other jurisdiction could be, and often are, provided by non government commercial entities. Furthermore, since most government finance reports are designed to show administrative accountability and hence are closely related to organizational structures, the raw data contained in these reports are practically useless for any study which seeks to relate the financial activities of one government to those of another.

The Canadian System of Government Financial Management Statistics seeks to overcome the lack of homogeneity in raw government financial information at the provincial/territorial level in the following ways:

Introduction

Cette publication présente les recettes et dépenses publiques de chaque province ou territoire du Canada sous forme de statistiques de la gestion financière des gouvernements. Elle vise d’abord à répondre aux besoins des utilisateurs en renseignements financiers relatifs aux activités de ces gouvernements en transformant les données particulières produites par chacun en statistiques normalisées pour les divers gouvernements (compatibles avec celles produites par la Division des finances publiques de Statistique Canada sur d’autres niveaux de gouvernement) et comparables d’une période de référence à une autre.

Système statistique de la gestion financière

Les concepts et classifications qui sous-tendent ce système statistique sont décrits en détail dans la publication “Le système canadien des statistiques de la gestion financière” (no 68-506 au catalogue). Les trois paliers de gouvernement au Canada - fédéral, provincial et local - se ressemblent beaucoup; ils comprennent une assemblée législative dont relève un groupe central de ministères ou services auxquels se rattachent une grande quantité d’organismes jouissant de divers degrés d’autonomie. Cependant, cette similitude de structure ne soutient pas un examen détaillé. Des ministères ou services ayant des noms semblables diffèrent sensiblement dans le cas de certains gouvernements; certains services fournis par un ministère dans une province le sont par un organisme dans une autre et ne le sont pas dans une troisième; de plus, bien que la plupart des organismes assurent des services “publics”, d’autres organismes fournissent des biens ou services qui, ailleurs, pourraient être fournis, et le sont souvent, par l’entreprise privée. Comme la plupart des rapports financiers des gouvernements font état de la responsabilité administrative et, par conséquent, suivent de près la structure de l’organisation, les données qu’ils renferment sont presque inutiles pour toute étude visant à comparer les activités financières de divers gouvernements.

Le système canadien des statistiques de la gestion financière cherche à corriger le manque d’homogénéité entre les renseignements financiers fournis par les diverses provinces ou territoires par les moyens suivants:

The government universe is divided in two parts - general government and government enterprises. The general government consists of:

Departments of government;

special funds (see "Appendix" for the list of special funds included in this report):

administrative and regulatory funds which perform functions similar to those of government departments;

agencies engaged in "industrial" or "commercial" activities, primarily to service the requirements of their own governments;

agencies engaged primarily in the channelling of funds from one level of government to another or among organizations at the same level of government, e.g., bodies established by provincial legislation to help finance the capital programs of municipalities and school boards;

Workers' Compensation Boards;

government-owned institutions such as those engaged in education, health and welfare services or administration of justice, e.g. agricultural schools, residences for handicapped persons, gaols, etc.;

Quebec Pension Plan;

non-trusted public service pension plans because their funds constitute an integral part of the consolidated revenue fund or which are otherwise available to the government in the financing of its operations;

working capital funds.

All entities classified to general government are consolidated into a single statistical unit for each government.

Revenues of each unit are classified by source and expenditures by function or purpose, while assets and liabilities conform with normal accounting classifications.

A government enterprise is an organized entity, usually corporate, established by a government to produce goods or services for sale on the open market at prices related to costs (this relationship being ascertainable from its own independent system of accounts), which has relatively autonomous management of its affairs and is staffed by other than public servants, though certain staff benefit schemes, e.g., superannuation, may be integrated with those of the public service of the parent government. The enterprises are classified by parent government and by Standard Industrial Classification. Financial statistics classifications for enterprises generally accord with those of commercial accounting.

L'univers est subdivisé en deux parties: l'univers gouvernemental et celui des entreprises publiques. L'univers gouvernemental comprend:

les ministères;

les fonds spéciaux (voir "la liste" des fonds spéciaux en annexe):

fonds administratifs et réglementaires dont les fonctions sont semblables à celles des ministères;

organismes ayant une activité "industrielle" ou "commerciale" pour répondre avant tout aux besoins des gouvernements dont ils relèvent;

organismes dont l'activité principale est l'acheminement de fonds d'un échelon de gouvernement à un autre ou entre des organismes d'un même échelon, comme ceux créés par des lois provinciales pour aider au financement des investissements des municipalités et des conseils scolaires;

commissions des accidents du travail;

les établissements appartenant à des gouvernements comme ceux qui s'occupent de l'éducation, de la santé et du bien-être social, ou de l'administration de la justice. Dans cette catégorie, entrent les écoles d'agriculture, les résidences pour personnes handicapées, les prisons, etc.

Le régime des rentes du Québec;

les régimes de pensions de la Fonction publique non constitués en fiducie parce que leurs fonds forment une partie intégrante du fonds consolidé du revenu ou sont de toute autre manière à la disposition du gouvernement pour le financement de ses activités;

les fonds de roulement.

Toutes les entités classées dans l'univers gouvernemental sont groupées en une seule unité statistique pour chaque gouvernement.

Les recettes de chaque unité sont classés par source et les dépenses par fonction ou but, tandis que les éléments d'actif et de passif suivent les classifications comptables normales.

Une entreprise publique est une personne morale, habituellement une société, créée par un gouvernement pour produire des biens ou services en vue de leur vente sur le marché libre à des prix établis en fonction des coûts (cela peut être vérifié à partir de son propre système indépendant de comptes), qui gère ses propres affaires de façon relativement autonome et dont le personnel n'est pas constitué de fonctionnaires, bien que certains avantages sociaux, comme la pension de retraite, puissent être intégrés à ceux du gouvernement dont elle relève. Les entreprises sont classées selon le gouvernement dont elles relèvent et les catégories de la Classification des activités économiques. La statistique financière des entreprises correspond généralement à la comptabilité commerciale.

While the foregoing outlines the bases on which the financial management system rests, the reader is urged to refer to the descriptive publication mentioned above to obtain the more detailed knowledge which is a prerequisite for the full comprehension and use of the statistics produced in accordance with this system. The full range of these statistical series is listed on the rear cover of the present publication.

The National Accounts Statistical System

A second national standardized system for the production of financial statistics of Canadian governments is contained in the framework of the Canadian System of National Accounts. While the financial management system depicts the expenditures made by government to discharge its functions, the relative importance of the different types of revenue raised to defray these expenditures, the means used to finance the deficit between revenue and expenditure or to dispose of any surplus of revenue over expenditure and the resulting financial situation of government; the economic analysis system is concerned with the economic effects of government activity. Although there are significant differences between the two systems in concepts and, particularly, in classifications, it is possible, as is shown in this publication, to cross-classify government financial data in economic terms. But, just as the resulting financial management statistics differ significantly from the estimates or public accounts from which they are derived, so the economic analysis statistics differ from the national income and expenditure accounts.

Coverage, Sources and Validity

The present publication covers the general government universe of each province and territory on an all-inclusive basis except for certain institutions for which complete financial reports are unavailable. These institutions are incorporated only to the extent of their financial transactions with their present governments; certain very minor revenues which these institutions obtain from other sources are omitted from the publication as are detailed analyses of their expenditures.

The financial statistics in this publication are derived from information contained in the estimates and budget speeches of the governments and from estimates of the special funds' financial transactions as compiled by The Public Finance Division. Additional detail is obtained in a few instances from correspondence with provincial and territorial authorities. The co-operation of provincial and territorial government officials is gratefully acknowledged.

The main tables in this publication have been reviewed by officials of the governments to which the data relates but final responsibility for the validity of the statistics remains with the Provincial Government Section of the Public Finance Division of Statistics Canada.

Même si nous venons d'esquisser les bases du système de gestion financière, nous prions le lecteur de se reporter à la publication mentionnée plus haut afin de mieux connaître ces bases, une condition essentielle à la parfaite compréhension et à l'utilisation des statistiques produites conformément à ce système. Vous trouverez la liste complète de ces séries statistiques sur la partie arrière de la couverture de cette publication.

Système statistique des comptes nationaux

Le système canadien de la comptabilité nationale est un deuxième système national normalisé pour la statistique financière des gouvernements canadiens. Alors que le système de la gestion financière présente les dépenses effectuées par les gouvernements pour s'acquitter de leurs fonctions, l'importance relative des différentes sources de recettes perçues pour assumer ces dépenses, les moyens utilisés pour financer le manque de recettes par rapport aux dépenses ou pour disposer l'excédent des recettes sur les dépenses et la situation financière finale des gouvernements; le système d'analyse économique s'intéresse, pour sa part, aux incidences économiques de leurs activités. En dépit de différences conceptuelles sensibles entre les deux systèmes, principalement dans les classifications, il est possible, comme le démontre cette publication, de recouper les données financières en termes économiques. Mais, tout comme les statistiques sur la gestion financière diffèrent considérablement des budgets ou des comptes publics dont elles sont dérivées, les résultats de l'analyse économique sont différents de ceux des comptes nationaux des recettes et dépenses.

Champ d'observation, sources et validité

La présente publication englobe toutes les activités gouvernementales de chaque province ou territoire, sauf certaines institutions pour lesquelles il n'existe pas de rapports financiers complets. Nous n'avons tenu compte de ces institutions que pour leurs transactions financières avec le gouvernement dont elles relèvent; cette publication ne prend pas en compte certaines recettes très faibles provenant d'autres sources et n'analyse pas leurs dépenses en détail.

Les statistiques financières de cette publication sont tirées de renseignements contenus dans les Prévisions et les discours du budget des gouvernements et des transactions financières des fonds spéciaux estimées par la Division des finances publiques. Dans quelques cas, des détails supplémentaires ont été obtenus directement des autorités provinciales ou territoriales. Nous remercions les fonctionnaires des provinces et territoires de la collaboration qu'ils nous ont accordée.

Les principaux tableaux de cette publication ont été vérifiés par les fonctionnaires compétents des gouvernements, mais c'est la Section des administrations provinciales, Division des finances publiques, Statistique Canada, qui a la responsabilité définitive des statistiques.

Revision of the Financial Management Statistics System

The most recent publication describing the Financial Management Statistics System (Catalogue 68-506) was issued in September 1972; amendments were issued in April 1974. Public Finance Division commenced a review of the System in 1979. This review has concentrated on strengthening the conceptual framework of the System, developments in government operations in the decade now ended together with changes in user requirements and have necessitated some modifications to the revenue and expenditure classifications.

While no changes have been made to individual revenue classifications, "Taxes" have been re-aligned into five groups - "Income Taxes", "Property and Related Taxes", "Consumption Taxes", "Health and Social Insurance Levies", and "Miscellaneous". This arrangement is more logical than that previously employed which appeared to give undue prominence to certain relatively minor categories.

While the changes made to expenditure classifications are more noticeable they should not affect the continuity of the series except in one relatively minor instance.

The function "Social Welfare" has been renamed "Social Services" and re-structured to provide greater clarity. It now comprises the sub-functions "Social Security", "Labour Force Plans", "Family Allowances", "Veterans Benefits", "Social Welfare", "Tax Credits and Rebates", and "Other Social Services".

Because it has become increasingly difficult to distinguish between expenditures related to conservation and those aimed at development, the two functions, "National Resources" and "Agriculture, Trade and Industry, and Tourism", have been combined into a single function, "Resource Conservation and Industrial Development". All the sub-functions of both former functions are allocated to the new function.

The function "Supervision and Development of Regions" has been re-named more appropriately "Regional Planning and Development". While the overall concept remains unchanged, four sub-functions - "Planning and Zoning", "Community Development", "Regional Development" and "Other" - are also now identified.

The sub-function "Regulatory Services" has been re-defined and re-named "Regulatory Measures". Previously, all expenditures related to regulatory activities were assigned to this classification. Such assignment, however, is now recognized to conflict with one of the basic principles of the System under which an expenditure is classified in terms of the

Révision du Système des statistiques de la gestion financière

La dernière publication décrivant le Système des statistiques de la gestion financière (no 68-506 au catalogue) remonte à septembre 1972, bien que des modifications aient été apportées en avril 1974. La Division des finances publiques a entrepris une révision du système en 1979. Cette révision vise surtout à donner plus de rigueur au cadre conceptuel du système, l'évolution des activités gouvernementales au cours de la dernière décennie, accompagnée des changements qu'ont connus les besoins des utilisateurs, a rendu nécessaire la modification de la structure des recettes et des dépenses.

Aucune modification n'a été apportée aux rubriques portant sur les recettes, mais les "impôts" sont maintenant divisés en cinq groupes: "impôts sur le revenu", "impôts fonciers et impôts connexes", "taxes à la consommation", "cotisations aux régimes d'assurance-maladie et d'assurance sociale" et "impôts divers". Cette structure est plus logique que la précédente où certaines fonctions de moindre importance semblaient occuper une place prépondérante.

Bien que les modifications effectuées au chapitre des dépenses soient plus nombreuses, la continuité des séries ne devrait pas être menacée, sauf dans un cas d'assez peu d'importance.

La fonction "bien-être social" s'appelle maintenant "services sociaux" et est restructurée en vue d'une meilleure clarté. On y trouve les sous-fonctions "sécurité sociale", "régimes concernant la population active", "allocations familiales", "prestations aux anciens combattants", "bien-être social", "crédits et dégrèvements d'impôt" et "autres services de bien-être social".

Comme il est de plus en plus difficile de distinguer les dépenses affectées à la conservation de celles destinées au développement, les fonctions "ressources naturelles" et "agriculture, commerce et industrie, et tourisme" ont été groupées pour former la fonction "conservation des ressources naturelles et développement de l'industrie". Toutes les sous-fonctions des deux anciennes fonctions font maintenant partie de la nouvelle.

La fonction "surveillance et mise en valeur des régions" est maintenant appelée, de façon plus appropriée, "planification et aménagement des régions". Le concept général n'est pas modifié, mais quatre sous-fonctions sont maintenant définies: "urbanisme et zonage", "aménagement des agglomérations urbaines", "aménagement des régions" et "autres".

La sous-fonction "services de réglementation" a été redéfinie et s'intitule maintenant "mesures de réglementation". Auparavant, toutes les dépenses affectées aux activités de réglementation figuraient sous cette rubrique. Toutefois, on a constaté que cette façon de procéder dérogeait à l'un des principes fondamentaux du système voulant qu'une dépense soit classée selon le service auquel elle est affectée. Par

service thereby provided. As a consequence, where the purpose of a particular regulation or regulatory program is to protect or foster a particular activity or industry, expenditures on the regulation or program are now classified under the same function as the related activity or industry.

Expansion of Information on Expenditure (68-205)

The introduction of a fully computerized system to process provincial revenue and expenditure data makes possible the presentation of expenditure data in Tables 2 and 6 of this publication at the same level of detail (generally, the sub-function) as in the "Actual" series (Catalogue 68-207).

Québec Pension Board

The data in this report for the province of Québec includes the revenues and expenditures of the Québec Pension Board, established by the province in 1965. (See Text Table III).

The only transactions, included at the provincial level (except Québec) as universal pension plans expenditures, are the contributions of provincial governments as employers to the Canada Pension Board. Being a federal agency, the revenues and expenditures are included in the federal government universe.

Text Table VI shows the position of the province of Québec in the case where the Québec Pension Board would have been considered a sub-sector of the provincial government universe instead of part of the universe.

Inter-Provincial Comparability

The "gross general" concept of revenue and expenditure as applied in this publication provides a measure of inter-provincial comparability but only at the general government level. Because of the varying importance of provincial government enterprises in the activities of the provincial public sub-sector in the ten provinces and the two territories and, even more, because of the divergences in the allocation of responsibilities between provincial and local governments among the provinces, complete comparability can only be achieved when provincial government and provincial enterprise operations are integrated and provincial and local government transactions are consolidated. This consolidation of the revenues and expenditures of the provincial and local government levels into a combined provincial-local statistical universe is presented in the Statistics Canada publication *Consolidated Government Finance* (Catalogue 68-202) in which the inter-level transactions are eliminated.

conséquent, lorsque l'objet d'un règlement ou d'un programme réglementaire en particulier est de protéger ou d'encourager une certaine activité ou une certaine industrie, les dépenses consacrées au règlement ou au programme sont classées sous la fonction représentant l'activité ou l'industrie concernées.

Élargissement des renseignements sur les dépenses (68-205)

Grâce au traitement entièrement informatisé des données provinciales sur les recettes et les dépenses, il est désormais possible de présenter les données sur les dépenses des tableaux 2 et 6 de la présente publication au même niveau de ventilation (généralement, la sous-fonction) que celui des séries "réelles" (no 68-207 au catalogue).

Régie des rentes du Québec

Les données de la province de Québec figurant dans la présente publication comprennent les recettes et des dépenses de la Régie des rentes du Québec, organisme créé par la province en 1965. (Voir le tableau explicatif III).

Les seules transactions incluses au niveau provincial (sauf Québec) comme dépenses pour les régimes universals de rentes, sont les contributions des gouvernements provinciaux à titre d'employeur au Régime de pension du Canada. Étant un organisme fédéral, les recettes et les dépenses sont inclus dans l'univers gouvernemental fédéral.

Le tableau explicatif VI présente la position de la province de Québec dans le cas où la Régie des rentes du Québec serait considérée comme une sous-section de l'univers gouvernemental provincial plutôt que partie intégrante de l'univers.

Comparabilité interprovinciale

Le concept des recettes et des dépenses "générales brutes" tel qu'il s'applique ici fournit une mesure de la comparabilité inter-provinciale, mais au niveau de l'univers gouvernemental seulement. Étant donné que l'importance des entreprises publiques provinciales dans les activités du sous-secteur public provincial des dix provinces et des deux territoires varie, et plus encore par suite des divergences dans l'attribution des responsabilités entre les gouvernements provinciaux et les administrations locales d'une province à l'autre, on ne peut obtenir une comparabilité parfaite que lorsque les opérations des gouvernements provinciaux et de leurs entreprises sont intégrées et lorsque les transactions publiques provinciales et locales sont consolidées. Cette consolidation des recettes et des dépenses publiques provinciales et locales en un univers statistique combiné provincial-local, est exposé dans la publication de Statistique Canada intitulée *Les Finances Publiques Consolidées* (numéro 68-202 au catalogue), et dans laquelle les opérations entre divers niveaux sont éliminées.

Explanatory Comments

Tables 1 and 2 Gross General Revenue and Expenditure

These tables include the current and capital revenue and expenditure transactions of the provincial government universe.

In order to achieve a measure of inter-provincial comparability, certain adjustments have been made to the figures shown in the provincial accounts. Reconciliations of “gross general” revenue and expenditure with provincial accounts are found in Tables 3 and 4. The adjustments are explained more fully in the commentary to those tables.

Tables 3 and 4 Reconciliation of Gross General Revenue and Expenditure with Provincial Accounts

These tables are included to explain the difference between current and capital revenue and expenditure as presented in provincial and territorial accounts, and gross general revenue and expenditure as compiled for the financial management series.

The revenues and expenditures of the special funds are accounted for separately and are not included in provincial or territorial revenues and expenditures despite the fact that the agencies in question perform functions that are really of a governmental nature. For purposes of establishing gross general revenue and expenditure, the transactions of these funds are added to budgetary transactions.

Because of variations in the extent to which provincial and territorial governments deduct amounts from revenue and expenditure in their financial statements, adjustments also are made in the series to reverse all of these deductions and to arrive at “gross” revenue and expenditure.

The trading operations of liquor boards are treated in the financial management series as enterprises and only their remitted trading profits are included in provincial or territorial revenues. In some provinces, however, liquor boards also carry out regulatory or control functions and derive revenue from these activities. This revenue, generally in the form of licences and permits, and the related expenditure are considered to be general government revenue and expenditure. Therefore, they represent an adjustment to the revenue and expenditure presented in the provincial government financial statements.

A uniform approach to the treatment of working capital funds in the financial management series results in adjustments to both revenue and expenditure. This compensates for the different presentation of such funds in the provincial and territorial accounts.

An attempt is also made to apply a consistent approach to recoveries of expenditure and refunds of revenue. A number of items regarded by the provinces

Commentaires explicatifs

Tableaux 1 et 2 Recettes et dépenses générales brutes

Ces tableaux comprennent les recettes et les dépenses ordinaires et de nature capitale de l'univers des gouvernements provinciaux.

Dans un souci de comparabilité interprovinciale, on a apporté certains ajustements aux chiffres figurant dans les comptes provinciaux. Les rapprochements des recettes et des dépenses “générales brutes” des comptes provinciaux se trouvent aux tableaux 3 et 4. Les ajustements sont expliqués plus en détail dans les commentaires de ces tableaux.

Tableaux 3 et 4 Rapprochement des recettes et des dépenses générales brutes avec celles des comptes provinciaux

On a inclus ces tableaux pour expliquer la différence entre les recettes et les dépenses ordinaires et de nature capitale tels qu'ils figurent dans les comptes des provinces et des territoires, et les recettes et dépenses générales brutes établis pour les séries de la gestion financière.

Les recettes et les dépenses des fonds spéciaux sont comptabilisés séparément et ne sont pas pris en compte dans les recettes et les dépenses des gouvernements provinciaux ou territoriaux en dépit du fait que les activités des organismes en question sont réellement de nature gouvernementale. Pour établir les recettes et les dépenses générales brutes, on ajoute les opérations de ces fonds aux opérations budgétaires.

Les sommes que les gouvernements provinciaux et territoriaux déduisent dans leurs états financiers des recettes et des dépenses pouvant varier, on apporte également des ajustements aux séries pour annuler toutes ces déductions et obtenir les recettes et les dépenses “brutes”.

Les activités commerciales des régies des alcools sont considérées dans les séries de la gestion financière comme des entreprises publiques et seuls leurs profits d'exploitation remis figurent dans les recettes provinciales ou territoriales. Cependant, dans certaines provinces, les régies des alcools ont également des fonctions réglementaires ou de contrôle d'où elles tirent des recettes. Ces dernières, généralement sous la forme de droits et de permis, ainsi que les dépenses correspondantes, sont considérées comme des recettes et des dépenses de l'univers gouvernemental et constituent donc un ajustement aux recettes et aux dépenses figurant dans les états financiers des gouvernements provinciaux.

Une approche uniforme dans le cas des fonds de roulement dans les séries de la gestion financière a donné lieu à des ajustements aux recettes et aux dépenses pour compenser la différence de présentation de ces fonds dans les comptes provinciaux et territoriaux.

On essaie également d'utiliser une approche homogène dans le cas des recouvrements de dépenses et des remboursements de recettes. Un certain nombre de postes considérés

as revenue or expenditure are considered to represent recoveries of current and prior year expenditures or refunds of current year revenues. Consequently, they are excluded from gross general revenue and expenditure.

Non-revenue and surplus receipts and non-expenditure and surplus payments represent items which are not regarded as provincial government revenue and expenditure transactions in this series. They also include such items as repayments of loans and advances, revenues collected on behalf of other jurisdictions, purchases and sales of investments, loans and advances and other surplus account transactions.

The deduction of intragovernment transactions represents the elimination of transactions among the component parts of the general government statistical universe for each province. Departmental expenditures included in the revenues of special funds and vice-versa, revenues of one special fund treated as expenditure in another special fund, and transfers of funds between departments would all result in the duplication of revenue and expenditure when these entities are combined to form the statistical universe for any particular province. It, therefore, becomes necessary to identify and eliminate these interfund or intra universe transactions.

Table 5 Economic Classification of Gross General Revenue

This table classified the gross general revenue of the financial management series by economic sources. The sources of government revenue for economic purposes are direct taxes on persons and business, indirect taxes, other current transfers from persons, transfers from other levels of government, investment income and other.

Direct taxes. Direct taxes include personal and corporation income taxes, payroll tax, succession duties and the levies imposed on logging and mining profits. Employee contributions to non-trusteed pension plans, contributions to the Québec Pension Board and Workmen's Compensation Board assessments are also considered as direct taxes - persons.

Indirect taxes. Indirect taxes encompass sales taxes, motor fuel taxes, insurance premiums, capital and place of business taxes, amusement taxes and real and personal property taxes. Privileges, licences and permits purchased by business entities such as motor vehicles licences, natural resource exploration permits, etc., are also regarded as indirect taxes.

Other Current Transfers from Persons. Transfers from persons consist of health insurance premiums, personal motor vehicle permits and licences, and other licences and permits such as fishing, hunting and

par les provinces comme des recettes ou des dépenses sont considérés comme des recouvrements des dépenses de l'année courante ou comme des remboursements des recettes de l'année courante, et sont de ce fait exclus des recettes et des dépenses générales brutes.

Les entrées de fonds qui ne sont pas des recettes et les entrées au titre de l'excédent, ainsi que les paiements qui ne sont pas des dépenses et ceux qui sont prélevés sur l'excédent, constituent les postes qui ne sont pas considérés comme des recettes et des dépenses des gouvernements provinciaux dans cette série; elles comprennent notamment les remboursements l'emprunts et d'avances, les recettes recueillis pour le compte d'autre autorités, les achats et les ventes de placements, les prêts et avances et les autres opérations au titre du compte de l'excédent.

La déduction des transactions entre les composantes du gouvernement consiste à éliminer les opérations entre les éléments constitutifs de l'univers statistique gouvernemental de chaque province. Les dépenses d'un ministère comprises dans les recettes d'un fonds spécial et inversement, les recettes d'un fonds spécial considérés comme dépenses dans un autre fonds spécial, les transferts de fonds entre les ministères; tous ces éléments amèneraient un double comptage des recettes et des dépenses lorsque l'on regroupe ces entités pour former l'univers statistique d'une province donnée. Il devient donc nécessaire d'isoler et d'éliminer ces opérations entre fonds ou à l'intérieur de l'univers.

Tableau 5 Classification économique des recettes générales brutes

Ce tableau classe les recettes générales brutes des séries de la gestion financière selon les sources économiques. Les sources des recettes publiques aux fins économiques sont les impôts directs des particuliers et des entreprises, les impôts indirects, les autres transferts courants des particuliers, les transferts d'autres niveaux d'administration publique, les revenus de placements et autres.

Impôts directs. Les impôts directs comprennent les impôts sur le revenu de particuliers et des corporations, l'impôt sur la feuille de paie, les droits successoraux et les droits imposés sur les bénéficiaires forestiers et miniers. Les cotisations des employés aux régimes de pension gérés par le gouvernement, les cotisations au Régime des rentes du Québec et les versements à la Caisse d'indemnisation des accidents du travail sont également considérés comme des impôts directs.

Impôts indirects. Les impôts indirects comprennent les taxes de vente, les taxes sur les carburants, les taxes sur le revenu de primes des compagnies d'assurance, les taxes sur le capital et les taxes d'affaires, les taxes sur les spectacles ainsi que les impôts sur la propriété foncière et personnelle. Les privilèges, droits et permis achetés par les entités commerciales, tels que les permis pour véhicules automobiles, les permis portant sur l'exploitation des ressources naturelles, etc., sont également considérés comme des impôts indirects.

Autres transferts courants des particuliers. Les transferts des particuliers comprennent les primes personnels pour véhicules automobiles et les droits et autres permis tels que les permis de pêche, de chasse et de mariage. Les amendes et

marriage licences. Fines and penalties also fall into this economic category.

Transfers from Other Levels of Government. This category includes both general and specific purpose transfers from federal and local governments. The provincial share of federal estate tax, the tax on undistributed income and income tax on privately owned public utilities are classified as transfer payments at the provincial government level.

Investment income. Interest, dividends and profits on foreign exchange, royalties and the remitted profits of government enterprises as well as liquor boards are included under this economic classification.

Other revenue. For example, sales of goods and services sales of land and fixed assets and other revenue items are not regarded as adding to production in the economic sense.

Table 6 Economic Classification of Gross General Expenditure

The objects of expenditure used in the economic classification are purchases of goods and services and transfer payments to persons, business and other levels of government.

Purchases of Goods and Services This classification includes all current expenditures of government on such salaries and wages, materials and supplies, travelling expenses, professional services, purchases of land, write-offs of bad debts and other final expenditures. For purposes of this publication, transfer payments to public hospitals are also treated as purchases of goods and services.

Transfers to Persons Transfers to persons consist of payments to individuals and non-profit institutions for which no direct service is rendered by the recipients. Included in this latter group are universities, other post-secondary educational facilities and private non-commercial organizations and associations. For purposes of this publication, interest on the public debt is also treated as a transfer to persons.

Transfers to Business This category includes both subsidies for current operations and capital assistance payments made to business. Subsidies for current operations represent payments designed to make it possible for producers to stabilize or lower prices while capital assistance covers grants made to commercial enterprises to assist in the acquisition of new facilities or machinery and equipment. Homeowners' subsidies paid by provincial governments in Saskatchewan, Alberta and British Columbia are also included in transfers to business.

pénalités entrent également dans cette catégorie économique.

Transferts d'autres niveaux d'administration publique. Cette catégorie comprend les transferts à des fins générales et à des fins spécifiques du gouvernement fédéral et des administrations locales. La part provinciale de l'impôt fédéral sur les biens transmis par décès, l'impôt sur le revenu non distribué des sociétés et l'impôt sur le revenu des services privés d'utilité publique sont classés comme des transferts au niveau du gouvernement provincial.

Revenus de placements. Les intérêts, dividendes et le profit sur le change étranger, les redevances et les bénéfices déclarés des entreprises publiques ainsi que les régies des alcools figurent sous cette rubrique.

Autres recettes. Par exemple, les ventes de biens et de services les ventes de terrains et d'immobilisations ainsi que d'autres éléments de revenu dont on ne considère pas, au sens économique, qu'ils contribuent à la production.

Tableau 6 Classification économique des dépenses générales brutes

Les articles de dépenses utilisés dans la classification économique sont les achats de biens et de services et les paiements de transfert aux particuliers, aux entreprises et à d'autres niveaux d'administration publique.

Achats de biens et de services Sous cette catégorie figurent toutes les dépenses ordinaires des gouvernements pour des postes tels que les traitements et salaires, les matières et les fournitures, les dépenses de voyage, les services professionnels les achats de terrain, l'amortissement des créances douteuses et autres dépenses finales. Dans la présente publication les transferts aux hôpitaux publics sont également considérés comme des achats de biens et services.

Transferts aux particuliers Les transferts aux particuliers consistent en paiements aux particuliers et aux institutions sans but lucratif et en échange desquels les bénéficiaires ne rendent aucun service direct. Dans cette catégorie se trouvent les universités, les autres établissements d'enseignement post-secondaire ainsi que les organismes et associations privés non commerciaux. Dans la présente publication, l'intérêt sur la dette publique est également considéré comme un transfert à des particuliers.

Transferts aux entreprises Sous cette rubrique entrent les subventions au titre des opérations ordinaires et les paiements sous forme de subventions pour fins d'immobilisation versés aux entreprises. Les subventions au titre des opérations ordinaires représentent des paiements destinés à permettre aux producteurs de stabiliser ou d'abaisser leurs prix, cependant que les subventions pour fins d'immobilisation portent sur des transferts consentis aux entreprises commerciales pour les aider à acquérir de nouvelles installations ou des machines et du matériel. Les subventions aux propriétaires de maisons payées par les gouvernements de la Saskatchewan, de l'Alberta et de la Colombie-Britannique font également partie des transferts aux entreprises.

Transfers to Other Levels of Government Transfers to other levels of government consist of grants to local governments. The term "local government" refers to municipalities, local school boards and other municipally organized bodies such as conservation authorities.

Table 7 Historical Summary of Gross General Revenue and Expenditure

This table presents actual data for three years, estimated data for two years on gross general revenue by source and gross general expenditure by function for each province and territory. Data are also presented at the Canada total. Estimated amounts are obtained from the present publication while actual data are to be found in the publication entitled *Provincial Government Finance - Revenue and Expenditure* (Catalogue 68-207).

Transferts à d'autres niveaux d'administration publique Les transferts à d'autres niveaux d'administration publique comprennent les allocations aux administrations publiques locales. Par "administration publique locale", on entend les municipalités, les conseils scolaires locaux et autres formations organisées en municipalités, comme par exemple les offices de conservation.

Tableau 7 Sommaire chronologique des recettes et des dépenses générales brutes

Ce tableau regroupe les données réelles pour trois années et les données estimatives pour deux années en ce qui concerne les recettes générales brutes par source et les dépenses générales brutes par fonction, par province et par territoire et pour l'ensemble du Canada. Les estimations proviennent de la présente publication, tandis que les chiffres réels sont extraites de la publication intitulée - *Les Finances des gouvernements provinciaux - Recettes et dépenses* numéro 68-207 au catalogue.

TEXT TABLE I. Revenue Sources as Percentages of Gross General Revenue
